

Are You a Silent Sufferer?

Do you have pain associated with:

- Plantar Fasciitis
- Tennis/Golfer's Elbow
- Achilles Tendonitis
- Jumper's/Runner's Knee
- Swimmer's Shoulder/Shoulder Pain

Now there is a groundbreaking technology available to treat your pain. **Tenex Health TX™** was developed in collaboration with the Mayo Clinic to provide patients with a minimally invasive option for:

- Quick pain relief
- Rapid return to normal activities
- Local anesthetic instead of general anesthesia
- No sutures, no stitches (tiny incision requires only a small adhesive bandage)
- Short procedure time - just minutes, not hours

Tenex Health TX (medically known as Percutaneous Tenotomy or Percutaneous Fasciotomy) combines sophisticated ultrasonic imaging to pinpoint damaged tissue with the advanced **TX MicroTip™** which precisely breaks down and extracts the damaged tissue that causes tendon pain.

Elmhurst Outpatient Surgery Center (EOSC) is one of the only facilities in Illinois offering this procedure. Recovery time is short and this medical procedure is covered by most insurances.

For more information and a list of physicians performing this procedure at EOSC, visit our website at www.eosc.org and click on TENEX under *What's New!*
